STOP THE COAL REFINERY!

We, the undersigned residents of Central New York oppose the building of a chemical coal gasification plant in the Town of Scriba. There are significant long-term negative environmental impacts, along with public health and safety concerns. This type of large scale fossil fuel facility should not be sited next to Teal Marsh, Lake Ontario, and residences. We urge the Town of Scriba to adhere and uphold the Local Law # 2 of 1996, especially sections 1.40 (protecting adjacent land), 1.90 (prohibiting manufacturing of fuels), and 5.10 (prohibiting pollution and noise). We would ask that the DEC or the EPA be the lead agency on the project. We urge all local municipalities to take action to oppose this project.
